SPEECH

FEEDING

Average number of spoken words: 29

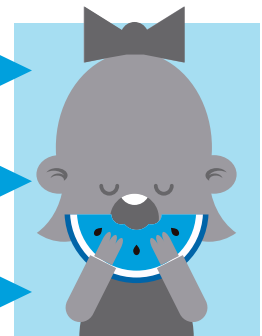

Average age at 1st word: 28 Months

100% Apraxia of Speech

68% Difficulties Chewing

65% Overstuffing Mouth

63% Excessive Drooling

Recommendations:

- Minimum of 90 - 120 minutes/week of speech therapy and specific approach should consider cognitive delays and attention difficulties.
- Continually target receptive vocabulary skills.
- Implement augmentative and alternative communication early.
- Assess for and treat apraxia of speech.
- Consider feeding therapy.
